

FIRST & ALWAYS THE BEST!

Min General Surgery Hospital
is playing a leading role in **K-medical care**

Jong Min Kim Representative Director

Seoul National University M.D. / Thyroid specialist / Seoul National University clinical advisor
/ Adjunct professor at Samsung Medical Center / Adjunct professor at Korea University Hospital

Min Hospital specializes in surgical procedures such as thyroid, diabetes, and obesity metabolic surgery. Min Hospital has established a prominent position in the treatment of tumors in the fields of thyroid, breast, and digestive system, as well as vascular and diabetes management, and obesity treatment. Especially, it holds the record for the highest number of surgeries in thyroid endoscopy, digestive therapy endoscopy, and varicose vein laser treatment worldwide.

Min Hospital has received recognition for its excellence and superiority from reputable societies in the United States, Australia, Europe, and other regions. As a result, many patients from Southeast Asia, including the United States, China, Thailand, Myanmar, Indonesia, Vietnam, and Central Asia, including Kyrgyzstan, consistently seek out Min Hospital for medical treatment.

Based on the therapeutic foundation of micro-invasive Surgery to minimize patient discomfort, Min Hospital values "the patient's needs as the highest priority" and practices the motto of "changing but unwavering dedication" in serving its patients with the best possible care. Min Hospital is committed to researching and developing safer and improved treatment methods, aiming to become an indispensable and unwavering institution meeting the needs of its patients.

ABOUT

Min Hospital, which opened in April 2008, has built a reputation as a specialized hospital focusing on diabetes, obesity metabolism, thyroid, breast, laparoscopy, gastrointestinal endoscopy, and health checkups, based on the belief of "serving the patients."

Currently, Min Hospital has evolved into a comprehensive hospital capable of treating most surgical and internal medical conditions. It is divided into specialized centers, including the Thyroid Center, Diabetes and Obesity Metabolism Center, Breast (Cancer) Center, Hernia Center, Varicose Vein Center, Anal Disease Center, Laparoscopy/Endoscopy Surgery Center, Gastrointestinal Endoscopy Center, Cardioendocrine/Respiratory Allergy Center, Submucosal Tumor Center of the Digestive Tract, and Comprehensive Health Checkup Center, covering a wide range of surgical and internal medical conditions.

Min Hospital, proud to be the number one in Korean surgery, is committed to providing high-quality medical services through relentless challenges, passion, and a culture of continuous learning. With innovative thinking, we strive to deliver exceptional healthcare to our patients.

Min Hospital is a medical institution that is insured by the Korean Medical Association Medical Liability Insurance Cooperative.

Min Hospital embraces the philosophy of "change" yet remains unwavering in our commitment to "service," considering it our utmost value. It strives to transcend beyond South Korea and achieve the status of the world's premier surgical hospital.

A surgical hospital with extensive clinical experience.

Min Hospital strives to provide the highest customer satisfaction through specialized medical services.

A hospital that prioritizes serving the patients above all else.

Min Hospital has adopted the 'Patient-Centered Care System' from the Mayo Clinic in the United States, ensuring patient safety as well as providing prompt and accurate personalized treatments. In addition, Min Hospital has implemented a 1:1 intensive management system for pre and post-surgery care, and operates a 24-hour call center to ensure convenience for patients in making appointments and accessing medical services.

Differentiated advanced medical facilities

Min Hospital presents itself as a Ubiquitous Hospital. Min Hospital has established a system through state-of-the-art information management to share patient information with affiliated university hospitals when necessary, allowing patients to receive homogeneous medical services from anywhere.

Min Hospital takes pride in being a top-tier institution in the field of micro-invasive surgery. Min Hospital is equipped with a dedicated laparoscopic surgery room (Stryker, U.S.A.), which is not commonly found even in university hospitals. Additionally, Min hospital has introduced 3D stereoscopic laparoscopic surgical equipment, possessing surgical precision comparable to robotic surgery.

Unceasing academic research activities

Since its opening in 2008, Min Hospital has been consistently presenting at the International Thyroid Endoscopy BABA Symposium every year. Min Hospital has delivered lectures on standardized BABA surgery techniques to surgical practitioners from China, Southeast Asia, and the United States.

Min Hospital is dedicated to continuous research and efforts to provide better treatments and care to our patients.
